

Voici les calculs du troisième exemple.

I	II	III
$1^3 = \frac{1953125}{953125}$	$3 \times 1^2 \times \boxed{2} = \frac{953125}{353125}$	$3 \times 1 \times \boxed{2}^2 = \frac{353125}{233125}$
1	12	
$\boxed{2}^3 = \frac{233125}{225125}$	$3 \times 12^2 \times \boxed{5} = \frac{225125}{2160}$	$3 \times 12 \times \boxed{5}^2 = \frac{9125}{900}$
	125	
$\boxed{5}^3 = \frac{125}{000}$	$\sqrt[3]{1953125} = 125.$
